

# Studies in late Tertiary paleobotany.

## - - In "Dr. K's" footsteps: A glimpse of Turkey in the UCMF paleobotany collections

Description: -

-

Rivers State (Nigeria) -- Social conditions.

Rivers State (Nigeria) -- Economic conditions.

Rivers State (Nigeria) -- Politics and government.

Rivers State (Nigeria) -- Social life and customs.

Spiritual life.

Church decoration and ornament -- Germany -- Pfaffenwinkel.

Churches -- Pfaffenwinkel.

Hermeneutics.

Ecology.

Education -- Curricula -- Philosophy.

Education -- Philosophy.

United States -- Biography.

Poles -- Finland -- History

Poles -- Norway -- History

World War, 1939-1945 -- Conscript labor -- Finland

World War, 1939-1945 -- Conscript labor -- Norway

Organisation Todt (Germany)

Vision disorders -- Information services.

Vision disorders -- Periodicals -- Bibliography.

Vision disorders -- Societies, etc. -- Directories.

Blindness -- Societies, etc. -- Directories.

Vision disorders -- Research.

Blindness -- Research.

Spanish: Adult Nonfiction

### The origin and spread of grass

.

### Publications

Circumferential increase took place by the enlargement of fusiform initials, rather than by anticlinal divisions of existing initials, as it does in seed plants. A critical period for angiosperm radiation, the remarkable flora preserved at this site has been quantified, but extensive taxonomic work remains. The controls underlying the depth and amount of soil carbonate hinge on the water balance, Ca +2 availability, soil CO<sub>2</sub> partial pressures, etc.

### Studies of the Pleistocene palaeobotany of California

Paleobotany Paleoclimatology, Paleoecology, Taphonomy Members of the paleobotany group use fossil plants to reconstruct past climatic conditions and to investigate paleoecology at levels from individual plants to plant communities and entire landscapes. Indeed, the most important shortcoming of the CLAMP method is well-hidden behind the statistical rigor. Does this reflect synchronized and episodic production, spatial distribution of the cones, mechanical barriers to predation, or some other factors? Michael Krings, in , 2009 Site of Origin Another interesting problem in angiosperm paleobotany has been concerned with defining the geographic regions where the angiosperms are believed to have originated D.

### Paleobiology

Based on the occurrence of *Pseudotsuga* at the Doby site and the geographical context of the sites, Kapp 1965, 1970 hypothesized that open, western needle-leaf forest extended into the southern High Plains during Illinoian time.

### **Studies in Neotropical paleobotany. XIII. An Oligo**

With only a few continuous records available, these types of analyses are not yet possible for the central Great Plains.

### **Gordonia**

A sample of spruce wood has yielded a radiocarbon date of  $14,770 \pm 100$  yrs B.

### **Palynology, tertiary**

None of the records available so far indicate closed forest or even savanna. Bulletin of Geosciences, 85 1 : 95 — 110.
