## Signs of Pregnancy at Age 50

How to lose weight in a week? Highlights include a new section on the perimenopause, an expanded section on neoplasia, and a discussion of oestrogens and breast cancer. Falling estrogen levels also increase a woman's risk for heart disease and Alzheimer's, as well as osteoporosis. The new edition is timely as we incorporate the WHI results and the lessons learned about hormonal therapy into our practices and our management of women in the menopause.
