### The Movement for Smoke Abatement in 19th

Smoke alarms of either the ionization type or the photoelectric type consistently provide time for occupants to escape from most residential fires, although in some cases the escape time provided can be short.

### Wood heaters and smoke complaints

There is no safe level of exposure.

### TCRP Smoking Laws

Annoyance Smoke, smuts and smell from bonfires are the subject of about 30,000 complaints to local authorities every year. Wood smoke can affect everyone, but the populations known to be at greater risk include: children, teenagers, older adults, people with lung disease -- including asthma and COPD, people with heart disease, outdoor workers, and people of low socioeconomic status, including those who are homeless and with limited access to medical care. Second, how can the percentage of working smoke alarms be significantly increased? If you smell gas you should phone the National Gas Emergency Service on 0800 111 999.

### Secondhand marijuana smoke is not just a growing nuisance, it's dangerous

Safety Fire can spread to fences or buildings and scorch trees and plants. Further, introducing more effective alarms in residential dwellings could have a greater impact in reducing deaths.

### Wood Smoke and Your Health

The photoelectric alarm responded quicker on average than ionization alarm in two of four smoldering fire configurations, responding before the ionization alarm in all 6 trials, while the ionization alarm responded before the photoelectric alarm in two of three trials for the other two configurations. Exploding bottles and cans are a hazard when rubbish is burned.

### Surgical Smoke

Graham Catt, Canberra Business Chamber's chief executive, wrote in a parliamentary submission the support system overlooked the losses felt by ACT businesses impacted by the poor air quality. With the Coronavirus, smoking laws need changing urgently. Although some people who give up smoking have no withdrawal symptoms, many people continue to have strong cravings for cigarettes.

**Report an issue with noise, smoke, smells or light**

The smoke from wood burning is made up of a complex mixture of gases and fine particles also called , particulate matter, or PM.
