Blue Ridge Summit: Tab Books, 1979.

Mimeograph

During printing, the stone is kept continuously wet with water as the image is inked, a process that requires numerous passes with an inking roller.

class.uafr.edu

The ink originally had a base and later became an oil in water emulsion. The zinc plates, on which the artists inscribed their reflections, were worked on during and after the trip — the experiential memory of the voyage now etched on their surface.
