## Design and Architecture: What is Danish Design?

Structures BIG E offers structural engineering services from concept to construction, both substructure and super structure. In collaboration with Danish Technical University BIG IDEAS resurrected the idea of the giant smoke rings for the Copenhagen Power plant.

## **The Wave (Vejle)**

Ole has vast experience in project management and controlling of both large and small-scale projects. To make these visions come true, we strategically engage stakeholders, communities, institutions, and the broader design field during our design process.

## **Design and Architecture: What is Danish Design?**

We look forward to hearing from you! Giulia first joined BIG in 2017 as project lead for the design of Islais Hyper-Creek proposal for the Resilient by Design competition, exploring solutions to adapt and protect the Bay Area from rain flooding, rising sea levels, and other environmental risks. The new neighborhood at Refshalsøen would serve further as a living laboratory as citizens anticipate rising water levels and would be focused on a self-sustaining, water-based, circular infrastructure. In 2019, CSI helped secure further legislative investment, to research Industrial Symbiosis for possible adoption in Washington State.

## **nord architects designs community center and parish in CLT wood in denmark**

Programmed recreational activities in the water and forward-thinking research relating to water storm water management initiatives, harvesting wave energy, hydroponic farming, etc. Andy Coward Andy Coward is Director and head of the structural engineering team. The is the latest product developed in partnership with Friday Home.

## **Converging Grounds : A Design Charrette on Density in Denmark**

Like a form of programmatic alchemy we create architecture by mixing conventional ingredients such as living, leisure, working, parking and shopping. Click on the image and read more about the book and how to buy it.
