The Fourth Revolution: The Age Of Digital Enlightenment

But why, one could ask, are we working so hard to make reading with new technologies like tablets and e-readers so similar to the experience of reading on the very ancient technology that is paper? We communicate through social media rather than spend an evening chatting, building relationships and enjoying company. With the advent of the Information Age and improvements in communication, this is no longer the case, as workers must now compete in a global, whereby wages are less dependent on the success or failure of individual economies. This is schoolyard but still true: Treat others the way you want to be treated.
