## Social differentiation of language

Although first-generation immigrants from Latin America and the Caribbean may not see themselves in terms of American racial categories, the second generation may do so. Each house will also have some nonessential attributes. The chief difference relates to the association of inherited wealth and landed property as a defining characteristic of the upper class.

## Social Demography

In the 2010 fall term, I taught a version of my quantitative data analysis course as a Visiting Professor at the Hong Kong University of Science and Technology. .

## Annotation

Perhaps through Chinese influence, and perhaps springing from a lack of, the Japanese class structure also ranked farmers above and other. These norms - like all norms of role behavior - are determined by the role expectations and role prescriptions that society makes to the speakers writers.

## Donald Treiman

Becoming an American includes learning about American race classification systems and about American racial attitudes and prejudices. It conducts ongoing and one-time empirical surveys, comparative research studies, public opinion surveys, and case studies, applying modern qualitative and quantitative research methods, and it also cultivates the development of sociological theory and methodology. In this respect, the works of Academician VV Vinogradov, for whose linguistic conception the socio-stylistic analysis of the language was very characteristic, are especially revealing.
