Piri Reis' Map: A Map to Intrigue East and West Alike

This claim is generally traced to Arlington H.

Piri Reis

The notes on the map explain that the map was synthesized from about 20 maps, many of which were captured from Spanish and Portuguese ships in the Mediterranean. Ptolemy's Geographia had been translated in Turkish after a personal order of some decades before. A planetary collision would be required, of the sort that has not occurred since the early period of planetary formation.

See , for more information. The scale of the rocks indicate a much smaller map. This is just the start.

The Reality and Myth of the Piri Reis Map of 1513?

He took part in the 1516-17 campaign against Egypt, and in 1517 was able to show his world map to Sultan Selim I. Also, if the map draws on ancient knowledge to show things no 16th century explorer would have known, why is the coastline continuous? He carefully observed the places that he went with a keen eye and with his experience and acquired skills in cartography, Piri Reis were able to create the first world map of 1513.

The Piri Reis Map

We can see that Europe and Africa are pretty good but with lots of inaccuracy in detail. Until 1928 the Turkish language was written with Arabic letters, but the language on the map is Turkish, not Arabic. You can, of course, come up with a mathematical transformation that will transform any map into any other map, but any transformation of the real world into the Piri Reis Map would be so convoluted and ad hoc that it would prove

nothing.

Piri Reis (1470

Nevertheless We can see two rose-compasses one in the north and the other in the south. The first official acknowledgment of Piri's deeds is an account of the sea fights in the years 1499-1502.
