## Product Range

In addition, we implement strict quality checks on the whole range of offered doors.

## Wood

Students should be familiar with how additives are used in specific polymer products, eg patio furniture, food packaging and carrier bags. We transform our range as per the stipulations given by the patrons in order to offer supreme contentment to them.

## English

The in-process system will be used to measure the surface waveforms of the timber sections produced in order to identify machine faults prior to taking corrective action. Rough timber bought in, sawn into different lengths, planed and moulded, grooved into various products, door frames etc.

## Mouldings

They should be able to describe the different processes. Moulded timber can be used for skirting boards and dado rails. All the above products are processed at the two plants and the CCA and Finger jointing plants conform to the SABS standards of compliance.

## Khanuja Timber Ply

Maninder Pal Singh Proprietorship has played a significant role in our accomplishment. The characters size can be changed instantly under computer control if required giving maximum flexibility in the production environment, enabling a single system to cater for the entire range of products. Safety in products and services to the customer.

## **High Resolution Inkjet Printer to Mark Timber Length and Grade marking**

Our skilled laminating division uses our range of laminating machines with specialist glues to manufacture laminated beams and posts, shelving and countertops, balustrading and stair treads.

### **English**

Has been in business for more than 3 decades. Timber This content is more than five years old. Calculation of quantities of materials sizes and costs.
