Here's how to retrain the workforce — and why we need to

Alternative approaches to reducing labor force barriers for working parents Policies that provide a direct benefit like paid leave and childcare will only reduce barriers to labor force participation or attachment for beneficiaries in a position to use them.

Retraining the American Workforce

See: Cary Funk and Kim Parker, Pew Research Center, January 9, 2018. At a minimum, wage insurance should help displaced workers recover some of the wages they would have otherwise lost.

Adult workers : retraining the American workforce (Book, 1995) [public-docs.talentcoach.ir]

But among similarly aged and educated Canadian and American men, participation rates have been largely identical over the past couple of decades. The share of adults who are partially retired in their early 60s has more than doubled since 1980. For example, virtually no workers were retired at age 60 in 1960.

The YEC Retooling and Retraining The American Workforce

Involuntary youth unemployment may have long-lasting effects, particularly for men. The changing workplace: restructuring, reevaluating, and retooling -- 3.

The YEC Retooling and Retraining The American Workforce

Based on Congressional Budget Office projections, an increase of that magnitude would be expected to reduce the estimated increase in the dependency ratio by a little less than a fifth. The US needs more workers and needs to do a better job of educating, preparing, and retraining the potential workers it already has to ensure that all Americans are positioned to prosper in the face of future economic competition. Reasonably, the increase in available wages should be viewed as positive regardless of its impact on participation.
