## Ponderosa pine

Higher coppice yield was obtained in a mixed planting of black cottonwood and red alder a nitrogen-fixing species than from pure plantings of either species 2. Fourwing saltbush populations may remain stable or increase on open, relatively undisturbed shrublands.

## Atriplex canescens

As the South Dakota portion will be part of an effort to expunge livestock waste. The average height of root suckers increased from about 3 feet 1 m to 8 feet 2.

## The Dakota Progressive: March 2018

Salinity and moisture stress in relation to dieoff of wildland shrubs. Fire history and the possible role of Apache-set fires in the Chiricahua Mountains of southeastern Arizona. Keys for identifying fourwing and other saltbushes are available e.

## Wyoming

Vegetation classifications describing communities dominated by fourwing saltbush are listed below by state and administrative region. In: McKell, Cyrus M, ed. Majority of understory characteristics were similar between CONTROL and BURN units before, one, and two years after the burn, but understory community structure remained strongly dissimilar.

## Rocky Mountain Forest and Range Experiment Station (Fort Collins, Colo.)

Where initial treatment is incomplete, one prescribed fire should suffice before a managed-fire program can begin.

## **Restoring and managing low**

Department of Agriculture, Forest Service: 318-331.

## **Ponderosa pine**

Historical perspectives regarding the sagebrush ecosystem . Denver, CO: Society for Range Management: 89-92.
