## BHS18

The samples were treated with a calcium acetate buffer in order to remove potential diagenetic matter.

## The Archaeology of Jebel al

Biochemical Methods Sample preparation and measurements of isotope analyses Strontium Isotope Analyses Only permanent molars were selected for isotope analyses. Hundreds of coins were found both there and at Mleiha featuring a head of Heracles and a seated Zeus on the obverse, and bearing the name of Ab'l el in Aramaic. Subsequent purification of Strontium was achieved in micro-columns filled with Eichrom® Sr-spec resin.

## Vol. 34, No. 2, 2008 of Paléorient on JSTOR

Rose goes on to explain that this landmass would have been well watered by four large rivers flowing in that era: the Tigris, Euphrates, Karun, and Wadi Batin. The Challenge of a Desert.

## The Archaeology of Jebel al

Some of the materials are in PDF format, some as the original PowerPoint presentations, others as Word documents. In den darauf folgenden Jahren wurden zusätzlich Isotopenmessungen Strontium, Sauerstoff und Carbonat an Enamelproben von einigen Individuen aus BHS18 und Vergleichsfundstellen durchgeführt. Towards the plain a flat stone midden borders the graveyard.

## Uerpmann H.

A thriving agrarian community benefited from the protection of the Mleiha Fort.
