

# The distribution, structural history and relationship to regional metamorphism of high-strain zones forming the Larder Lake-Cadillac deformation zone, Matachewan area, Abitibi belt

Ministry of Northern Development and Mines - High Strain Metamorphism • GeoLearning • Department of Earth Sciences

Description: -

- Thailand -- Officials and employees -- Directories.
- Thailand -- Politics and government.
- Buddhist monks -- Thailand -- Titles.
- Nātchamnong Khun, 1885-1967.
- Pinklao, King of Siam, 1808-1865.
- Abitibi greenstone beltThe distribution, structural history and relationship to regional metamorphism of high-strain zones forming the Larder Lake-Cadillac deformation zone, Matachewan area, Abitibi belt
- The distribution, structural history and relationship to regional metamorphism of high-strain zones forming the Larder Lake-Cadillac deformation zone, Matachewan area, Abitibi belt

## Regional Metamorphism

This is significantly less than the 15-25 cm yr<sup>-1</sup> observed in the Neoproterozoic interval. Geological Survey Professional Paper 787. They are distributed along major compressional to transtensional crustal-scale fault zones in deformed greenstone terranes commonly marking the convergent margins between major lithological boundaries, such as volcano-plutonic and sedimentary domains.

A

The more rare E-type diamonds, by contrast, are considered to have crystallized directly from a magma intruded into or ponded below the keels Haggerty, 1999.

## Evolution of gold

By contrast, the UG2 horizon well removed from such bodies comprises the normal, magmatic PGE-sulfide minerals such as braggite and cooperite Peyerl, 1982. They include John Taylor copyediting , Judith Kinnaird and Dave Waters Introduction , Grant Cawthorn Chapter 1 , Philip Candela Chapter 2 , Franco Pirajno Chapter 3 , Michael Meyer Chapter 4 , John Parnell and Harold Reading Chapter 5 , and Mark Barley, Kevin Burke, and John Dewey Chapter 6 .

A

Petrology and Geochemistry of the Bucko Lake Nickel Deposit Thompson Nickel Belt, Manitoba 1985 University of Toronto M.

## **Structural Control On Ore Genesis**

Domains with few data points were evaluated grouped with domains which exhibit similar mineralization and orientations.
