

# Evolution and religion - or, Faith as a part of a complete cosmic system

**Putnam - Evolution and religion; or, Faith as a part of a complete cosmic system : Bascom, John, 1827**

Thinking box	Critical between faith & religious service	No conflict between faith & religious service
Should scripture be interpreted literally or figuratively?	"We believe the Biblical account of the creation of the world is a true history, and that it is a matter altogether out with our power to decide what it means." "God only by works can bring about his will; and if God's acts of creation and providence are to be explained by the theory of evolution, we must suppose that God has done his work in a way which would make it appear as if he had done it in another way." "What we do know is that the creation of the world is a mystery, and that we are destined from the historicalAdam and Eve, and the Fall, to the death of Christ and the resurrection of the body." (General Association of Religious Bodies)	"The Bible / is in no way directly relevant scientific inquiry. It is a matter of personal belief whether one accepts it or not, but it is not a matter of science." "God only by works can bring about his will; and if God's acts of creation and providence are to be explained by the theory of evolution, we must suppose that God has done his work in a way which would make it appear as if he had done it in another way." (General Association of Religious Bodies)
Should scripture or science be given more authority?	"The Bible is without doubt and undeniably as old as the earth itself, and is the word of God, and is the most authoritative history extanting over us, and we are to accept it as such, and let it stand as the word of God, and let it stand as the word of God, and let it stand as the word of God." (Pope Paul VI)	"There is no present evidence which would lead us to believe that the theory of evolution is in any way contrary to the Christian religion." "The theory of evolution is not contrary to the Christian religion, but it is not in accordance with it." (Protestant Church USA)
What should the relation between science and religion be?	"Leave the Bible at the West of God, as either a record of man's ignorance of spiritual truth, or of his infatuation with material objects." "Leave the Bible alone." "We must strive to make a wise partition between the domain of science and that of religion. Many efforts of ecclesiastical writers are made to reconcile the two, but they are all futile." (Church Missionary Society)	"Our responsibility as Christians is to deal seriously with the theory of evolution, and to do so in a spirit of moderation, evidence included." (Protestant Church USA)
Evangelism or education?	"Evangelism is therefore incompatible with the Biblical account of creation, and the theory of evolution is irreconcileable with the Biblical account of creation." "The Bible presents God as the author of all creation, and the theory of evolution does not do this." (John's Witness)	"God has told that it is better and nobler, 'to serve to please God, than men.' We have developed from the animal creation, and we are to return to the animal creation when we have begun to die, and when we have died, we are to be buried in the ground and raised up again in the resurrection of the dead." (John's Witness)

**Evolution and religion; or, Faith as a part of a complete cosmic system : Bascom, John, 1827**

And this approach, at least preliminarily, appears to be. Suffering is part of God's divine will, plan, or design e. Evolution says that humans are not a special creation of God but evolved from simpler forms of life and are just part of the animal kingdom.

**Evolution, religion, and why it's not just about lack of scientific reasoning ability**

The tragic thing is that the Popes following Paul VI continued on the same path, praising the pantheist theologian and promoting evolutionism.

**Evolution and religion; or, Faith as a part of a complete cosmic system : Bascom, John, 1827**

Egoism self-importance leads to desire, craving, and attachments, which can lead to unwholesome thoughts and wrong behavior, e.
