Professional Psychology: Research and Practice

These 18 projects explored ways to more effectively and efficiently deliver primary care in various practice contexts e. Implementation science involves the study of conditions that promote or hinder the implementation of an EBP. Based on previous research, any activity that promotes the successful retrieval of information should improve learning.

Teaching the science of learning

Bransford, Cochair Committee on Developments in the Science of Learning Committee on Learning Research and Educational Practice First released in the Spring of 1999, How People Learn has been expanded to show how the theories and insights from the original book can translate into actions and practice, now making a real connection between classroom activities and learning behavior. Commentaries are sent out for peer review.

Definition and measurement of guilt: Implications for clinical research and practice

Research has focused on interleaving material that is somewhat related e. In these situations, I change identifying details.

The Science of Learning

Kornell and Bjork examined the effects of interleaving in a task that might be pertinent to a student of the history of art: the ability to match paintings to their respective painters. Functioning in accordance with general policies determined by the Academy, the Council has become the principal operating agency of both the National Academy of Sciences and the National Academy of Engineering in providing services to the government, the public, and the scientific and engineering communities.

Bridging the Research to Practice Gap

However, he really wants to finish his work in time to go to Florida on spring break with his friends, who are leaving tonight.

Medication adherence self

This post is part of a special series curated by APA Division 15 President Nancy Perry. For example, if a student reads a sentence and then immediately covers the sentence and recites it out loud, they are likely not retrieving the information but rather just keeping the information in their working memory long enough to recite it again see Smith, Blunt, et al.
