## Dissertations / Theses: 'Truckee

The aim of this work was to quantify and qualify the irrigation impacts and of the climatic seasonality over soil and water resource in Irrigated District of Baixo Acaraí, Ceará, Brazil. The objectives of this study was to determine the perceived reasons for the failure of the irrigation schemes and determine the association between socio-economic characteristic of farmers and the perceived reasons for these schemes.

## A stream sediment geochemical reconnaissance of the Golden Trout Wilderness, California. (1983 edition)

The past two seasons indicated that high frequency irrigation worked better on sandier soils than soils containing high clay contents. Punjab is the most populated province of Pakistan.

## Geochemical map showing anomalous concentrations of selected elements in stream sediments from the Golden Trout Wilderness, California [cartographic material] / by D.L. Leach, R.J. Goldfarb, and J.A. Domenico ; Department of the Interior, United States Geological Survey

This research focuses on an outcome assessment of the irrigation project as it relates to the livelihoods of people in the Dotito rural communal area. The grower survey indicated that there was no preference towards the use of taper nozzles in windy conditions. Irrigation system of Punjab is not very developed.

## Basic data report and geochemical summary for stream sediments, heavy

Using Erickson's theory of psychological development as the foundation, the purpose of this case study was to explore whether, from the perspectives of key stakeholders whether interventions and prevention services for juvenile justice clients in Carson City met the needs of youthful offenders also diagnosed with PTSD. The samples were analyzed for uranium, as well as 15 to 20 trace elements, using neutron activation techniques. All three models can be adequately used to explore farmers' irrigation behavior for a given site.

## **Basic data report and geochemical summary for stream sediments, heavy**

Named official state fish of California in , the golden trout was once transplanted as far as east as New York. These observations were modelled using the crop simulation model APSIM sugar to assess the strategy over a longer time interval and the influence of seasonal variation.
