## History of Pottery

As of the most ancient manufacture he places those pieces enriched with blue and manganese colours as well as yellow lustre, and painted with arms, interlaced ornaments, and sometimes writh animals enclosed in a medallion. In the Alcazar of Seville specimens are seen of azulejos, both of Moorish and Catholic manufacture. Here I wish to present some communication and inspiration for those who produce, promote and just plain adore this art medium like I do.

## Manises (Valencia). Craftsmen

These are achieved by exploring the ratio between mass, volume and space. Azulejos were extensively fabricated at Seville from the sixteenth century, and probably those of the Casa de Pilatos, the Chapelle de Faience of the Alcazar, and other edifices in Seville, were made in that city.

## Jack Doherty

Hispano-Moresque wares had a considerable influence on early Italian , indeed two possible derivations of the name have connections with it. The courses were mainly on wheel throwing and glaze preparation.

## History of Pottery

The flat surface makes it perfect for serving cheeses, appetizers or cakes, or it can be hung as decoration on the wall.
