APL

Indeed, these scatterplots show that despite the broad positive correlation, there is substantial dispersion away from the trend line — in other words, there is substantial variation in outcomes that does not seem to be captured by differences in expenditure. Attainment · Achievement of minimum levels of learning by approximately all children at the primary level, and introduction of this concept at the upper primary stage on a large scale.

United Nations Statistics Division

The Common Entrance Examination CEE and the National School Certificate—both designed and administered by the Ministry of Education—are the main system of evaluation. Conclusions Going through the list of data-gaps identified above, one gets the impression that the same have been identified time and again in a number of seminars and conferences organised in the past but to no significant improvement has been noticed. Dacca: Institute of Education and Research, 1977.

Education Statistics (EdStats)

Consequently, several schools showed excess capacity. It is a helpful measure, because it allows aggregation of attainment across education levels.

• U.S. number of college students 1965

Generally, classes begin on the first Monday in September and end on 30 June, with breaks at Christmas and Easter. Within that framework, several initiatives are being pursued.

New data: Online enrollments grow, and share of overall enrollment grows faster

The POA 1992 identified poor urban slum communities, family labour, working children, seasonal labour, construction workers, land-less agricultural labour, forest dwellers, resident of remote and isolated hamlets as some of the target groups. Therefore, apart from the past and

present information, information on a number of variables in future is also needed which may or may not be readily available. Notes: Except where indicated, regional groupings are based on United Nations geographical regions with some modifications necessary to create to the extent possible homogenous groups of countries for analysis and presentation.
