**Handbook on Women Workers :  
Bulletin (United States. Women's Bureau)**

Many such young people shop for jobs as they start their work careers. Whether or not a particular woman will look for employment depends on various economic, social, and psychological factors at the time in her life when she debates the decision. But the higher rate among women is also the result of the more restrictive and discriminatory hiring practices that affect women—whether they are low-skilled workers with only limited education or highly skilled professionals with much education.
