Vitamin E can help inhibit such oxidative reactions that ROS to include superoxide anion radical, singlet oxygen, hydroxyl radical, and perhydroxyl radical inflicts Gropper et al. A number of studies have been conducted to explore the roles of various antioxidants in cardiovascular diseases. The best way to do this is to eat a variety of fruits and vegetables.

Free Radical Oxidation

Encourage patients to stop smoking.

Vitamin E

Oxidation of α -tocopherol in subcellular fractions from rat brain and its possible involvement in nerve function. The induction of free radicals and oxidative stress by BPA is believed to contribute significantly to the toxicity and carcinogenicity of this compound.

Do free radicals play causal role in atherosclerosis? Low density lipoprotein oxidation and vitamin E revisited

Archives of Biochemistry and Biophysics 1997, 342 2 , 236-243. Preparation and Characterization of 8a- Phosphatidylcholine-dioxy - α -tocopherones and their Formation during the Peroxidation of Phosphatidylcholine in Liposomes. Free radicals must play causal role in pathogenesis of atherosclerosis and vitamin E should be effective if given at right time to right subjects.
