## About Us

Bakermans-Kranenburg M, Van IJzendoorn M, Juffer F. Dan has also been a part time clinical author of clinical knowledge summaries and writing guidelines for primary care. She has worked on health or medical related issues in a number of Government Departments including Department of Health, Medical Devices Agency, Department of Innovation, Universities and Skills, and the Treasury.

## **effectiveness of social marketing in global health: a systematic review**

This report presents a detailed strategy to address both wet and dry storage risks. The worst it can be is a disaster.

## **Promoting social and emotional development and wellbeing of infants in pregnancy and the first year of life**

These areas included childhood pneumonia, voluntary medical male circumcision, medication abortion and post-abortion care and emergency contraception. JJKL has gained a reputation for taking the evidence from our direct work with individual children and young people to fight for wider reform through strategic litigation and empowering children and young people to campaign. The tutoring of theories of prevention reviews the principles of primary and secondary prophylaxis.

## **Oxfordshire Public Health**

The lack of controlled research on the effectiveness of co-response models of police mental health triage There is a striking lack of evidence for the effectiveness of co-response models of triage despite the substantial investment these services have received. Limited follow-up Only short-term follow-up data were available for most interventions that showed benefits.

## **The Howard League**

The lack of demonstrated direct benefits of interventions on infant social and emotional development and wellbeing has implications for improving study designs of future research.
