## Heart Disease and Stroke Mortality in the Twentieth Century

What effects does the condition have on economic performance and productivity of the country? Graduates of community college programs seemed well suited to assume employment as hospital bedside nurses. This chapter summarizes the trends in heart disease and stroke in the 20th century, advances in the understanding of risk factors for these diseases, and development of prevention and intervention programs to reduce the risks of developing and dying from heart disease and stroke. Public health is the disaster that didn't happen.
