Global seagrass research methods in SearchWorks catalog

Of the 13 genera and 58 species of sea grasses reported worldwide, 14 species belonging to 6 genera are in India, out of which 13 species are found in the Gulf of Mannar Biosphere Reserve Kannan et al.

Seagrass at FIU

The plants filter nutrients and contaminants from the water, stabilise sediments and act as dampeners to wave action. Some fast growing seagrass meadows are able to rebound from disturbances, but many grow slowly over the course of centuries and are likely to be slow to recover and are thus most vulnerable. In Western Australia's Cockburn Sound near Perth, outbreaks of the sea urchin *Tremopleurus michelini* reportedly locally denuded *Posidonia sinuosa* seagrass meadows to bare sand Cambridge et al.

About the Toolkit

Smith 1995 Importance of terrestrially-derived, particulate phosphorus to P dynamics in a west coast estuary Chambers, R. The use, distribution or reproduction in other forums is permitted, provided the original author s and the copyright owner s are credited and that the original publication in this journal is cited, in accordance with accepted academic practice. Vanderklift Science behind management of Shark Bay and Florida Bay, two P-limited subtropical systems with different climatology and human pressures Kendrick, G.

About the Toolkit

Macreadie Water quality, isoscapes and stoichioscapes of seagrasses indicate general P limitation and unique N cycling in shallow water benthos of Bermuda Fourqurean, J. While recent work has documented the recovery of mutualisms in seagrass e.
