Planning An Endoscopy Suite For Office And Hospital PDF Book

Patients with an ASA score of III should be further assessed for appropriateness of the office setting.

Setting Up an Endoscopy Facility

Administration of Conscious Sedation Conscious sedation used as an adjunct to endoscopic procedures must be administered safely.

Planning an endoscopy suite for office and hospital (1990 edition)

ASA III patients may be acceptable candidates if deemed so by a physician qualified to assess the specific disability and its impact on anesthesia and procedure risks.

Planning an endoscopy suite for office and hospital (1990 edition)

Anesthesia should be administered only by a licensed, qualified and competent practitioner. Endoscopes should be cleaned to a high level of disinfection, as outlined in the Standards for Infection Control and Reprocessing of Flexible Gastrointestinal Endoscopes as issued by the Society of Gastroenterology Nurses and Associates. To ensure that patients having endoscopy in an office setting have the appropriate level of safety and quality, standards of care need to be set and met.
