1910.109

Included are jobs which involve operation of equipment, jigs, or machines that were designed or modified to perform particular munitions operations. Such blasting caps or other explosives shall be in DOT-specified shipping containers; see 49 CFR Chapter I.

Filesize: 63.310 MB

11 Rules for Safe Handling of Hazardous Materials

The purpose of this candidate standard is to provide a consistent foundation for agencies to develop specific operational procedures and competencies while recognizing the need for each agency to customize specific procedures to their local environment. All OME professionals are required to operate under highly regulated conditions because of the need to control safety and quality. This is a new requirement proposed by the Petition Ex.

1910.109

No person shall act as a building official for any municipality until the State Building Inspector, upon a determination of qualification, issues a license to such person, except that a license shall not be required 1 in the case of a person certified prior to January 1, 1984, or 2 in the case of a provisional appointment, for a period not to exceed ninety days in order to complete such training program and licensure classes, made in accordance with standards established in regulations adopted by the State Building Inspector and the Codes and Standards Committee in accordance with the provisions of chapter 54.

1910.109

This standard identifies a method to allow multiple agencies to share public safety unit status updates among disparate CAD systems while continuing to use their agency specific Status Codes mapped to the Common Status Codes. History: 1971 act deleted reference to repealed Secs.

WorkSafeBC

In addition, paragraph c 1 vi would require a program of systematic maintenance of equipment be conducted on a regular schedule.

Explosives and Ordnance Training (EOT)

This proposed requirement is derived from existing paragraph d 2 iii b and paragraph 7. This is a change from existing paragraph d 2 iv which contains a detailed list of items to be inspected on the vehicle and paragraph 7. Paragraph f 1 i A would require the employer to ensure that the blaster-in-charge is trained, knowledgeable, and experienced in the storage, transportation, handling, and use of explosives.

11 Rules for Safe Handling of Hazardous Materials

Two broad classes of water gels are i those which are sensitized by a material classed as an explosive, such as TNT or smokeless powder, ii those which contain no ingredient classified as an explosive; these are sensitized with metals such as aluminum or with other fuels. Department of Transportation DOT regulations.
