Faculty of Automatic Control and Computer Science

In this era of the Internet and information technology, AC faculty are addressing challenging control problems in systems with mobility and autonomy capabilities such as large robotic swarms and automated transportation systems, smart homes and cities, humanoid robots, and unmanned systems in the air, land, and sea. Our team of reviewers includes over 35 experts, both internal and external 50%, from 6 countries.

Automatic control and computer engineering. (1963 edition)

The graduate in Automation and Control Engineering is an expert who can actively participate and take the lead in the executive design and development of products and systems. The current curriculum is the outcome of over 30 years of experience and evolution, closely following the progress in the fields of Automatic Control and Computer Science.

Automatic Control Systems: Basic Analysis and Design (The Oxford Series in Electrical and Computer Engineering): Wolovich, William A.: 9780030237737: public-docs.talentcoach.ir: Books

Mechatronics can also be offered as a concentration for mechanical engineering, electrical engineering or information technology programmes.

Faculty of Automatic Control and Computer Engineering

The Faculty of Automatic Control and Computers prepares engineers in the following fields: the structure and architecture of computing systems, systems based on microprocessors, programming languages, software applications systems, artificial intelligence and expert systems for the students of the Computer Science department and control systems engineering, advanced management systems, robots and automated production systems, bioengineering and intelligent systems, industrial automation for the students of the Automatic Control and Industrial Informatics department.

Automatic Control : Research Areas : Research

Personal criticism of the authors must be avoided.
