What Forensic Science Career is Right for You?

In forensic labs the ethical questions usually involve the assumption of neutrality of the forensic scientist. The BLS reports don't list forensic toxicologists; however, the BLS does track data for forensic science technicians, which is a related specialty. However, their role goes much further, from restoring a burned or liquid-soaked document to classifying the type of printer used in a crime.

Forensics Career Paths

Practitioners work in government or private sector agencies and use medical and scientific procedures to analyze evidence from crime victims or patients.

All About Forensic Science Careers

Additionally, professionals with doctoral degrees can qualify for tenured teaching positions at colleges and universities. Questioned Documents: Forensic document examiners are primarily known for analyzing handwriting and signatures.

Careers in Forensic Science

Forensic scientists often work in teams, which makes communication and collaborative skills vital.

Students and Educators: Careers in Forensics

This is primarily a lab job, and DNA analysts do not spend much time at crime scenes, although they may be asked to testify in court about their findings. Specially trained in evidence collection, technicians must have an eye for detail.
