## Down with God! How the Soviet Union took on religion

This effect, the simultaneous representation of dynamic continuity, produced in the object a quality that the founder of Futurism, F. The disease from which architectural art suffers dates from a remote period; it has not been developed in a single day; we see it increasing from the sixteenth century to our own times; from the time when, after a very superficial study of the architecture of ancient Rome — certain of whose externals were made objects of imitation — our architects ceased to make the alliance of the form with the requirements and the means of construction the chief consideration. This is consistent with our previous claim that modern historical consciousness arose precisely during this period.
