Surveying Services — Wetland Studies and Solutions, Inc.

In Wisconsin, Green Bay 133 years and Racine 118 years set new records. In northern California, the Kincade Fire began on October 23 and burned nearly 78,000 acres 31,565 ha and destroyed 374 structures. At the same time, farm income was forecast to increase nationwide in 2020 see for details.

18. Wetlands

Pressures Water availability Water availability is the most significant pressure on the health of wetland ecosystems.

Waterfowl Breeding & Habitat Surveys

CLM includes long-form articles, events listings, publication reviews, new product information and updates, reports of conferences and letters. This survey shows that floodplain wetland area across eastern Australia declined in 2014 to below the long-term average 1983 to 2014 , and that this decline over time was statistically significant. Increasing levels of nutrients called eutrophication and sediments from these activities can result in depletion of dissolved oxygen levels called or , , excessive plant growth, increased turbidity and siltation.

Missouri Department of Natural Resources

By the end of the month, drought conditions were gone from Virginia, North Carolina, South Carolina, Georgia, and Alabama. The Kincade Fire, located in Sonoma County, California, burned through nearly 78,000 acres and destroyed approximately 350 structures.
