

# Revision of the catsharks, family Scyliorhinidae

Dept. of Commerce, National Oceanic and Atmospheric Administration, National Marine Fisheries Service : for sale by the Supt. of Docs., U.S. Govt. Print. Off. - Bristly catshark

Description: -

- 
- Pregnancy
- Industrial hygiene
- Mexican bean beetle -- Control -- United States
- Scanning systems
- Forest surveys
- Earth sciences -- Remote sensing
- Artificial satellites, American
- Fisheries -- United States -- Indexes
- Nicolet National Forest (Wis.)
- Forests and forestry -- Wisconsin
- Victims of crimes surveys -- United States -- Statistics
- Water supply -- United States -- Costs
- Radioactive fallout -- Physiological effect -- United States.
- Radioactive contamination of milk -- United States
- Radioactive fallout -- United States -- Observations.
- Phosphate mines and mining
- Uranium mines and mining -- West (U.S.)
- Coal mines and mining -- West (U.S.)
- Strip mining -- West (U.S.)
- Sewage disposal plants -- Maryland -- Piscataway
- Sewage -- Purification -- Activated sludge process
- Carbon, Activated
- Logging -- Accidents -- Appalachian region.
- Recreation areas -- United States
- Recreation -- Research
- Shipment of goods
- Farm produce -- Transportation -- United States.
- Carriers -- United States
- Scyliorhinidae
- Sharks -- Identificationrevision of the catsharks, family Scyliorhinidae
- 
- Technical report series (Canadian Wildlife Service) -- no. 268
- Technical report series -- no. 268
- General technical report FPL -- 22
- NOAA technical report ; NMFS CIRC-422revision of the catsharks, family Scyliorhinidae
- Notes: Bibliography: p. 147-152
- This edition was published in 1979

## Catshark

Bottom habitats in the very deepest oceans below 9000 m are sometimes referred to as the abyssal zone. This shark may also have noticeably white tips on its two dorsal fins and a white line across its gills.

## Scyliorhinidae

The water temperature should be maintained between 72-78° F 22. Many species of catshark are not endangered. Accessed August 23, 2004 at.

## Bristly catshark

Filesize: 19.81 MB

Scyliorhinidae is the oldest group within the order Carcharhiniformes.

## ADW: Scyliorhinidae: INFORMATION

Sometimes, bamboo sharks, like the whitespotted bamboo shark *Chiloscyllium plagiosum*, may be incorrectly labeled. New York, NY: John Wiley and Sons. Habitat, Distribution and Biology: This is by far the largest family of sharks, with a broad worldwide geographic range in tropical to cold-temperate and arctic waters; catsharks occur from the intertidal zone to the edges of the continental and insular shelves and down the slopes to depths greater than 2000 m.

## **Bristly catshark**

Kingdom: Phylum: Subphylum: Class: Order: Family: Scyliorhinidae There over 100 species in of small sharks in this family.

## **Scyliorhinidae**

Pieces of fish, shrimp, squid, and even some crabs every once in a while will make sure that your shark is getting the diet it needs.

## **Bristly catshark**

This is called sexual heterodonty, and it occurs most strongly in smaller species of catshark. In this case several eggs develop in each oviduct, and hatching time tends to be shorter 23 to 36 days in.

## **Catshark**

Many occur along continental and insular slopes, and this deepwater habitat makes many catsharks difficult to observe and collect. Dordrecht, The Netherlands: Kluwer Academic Publishers.
