Letters and Technical Comments are sent to the authors of papers on which they comment for response or rebuttal, but otherwise are treated in the same way as other contributions with respect to confidentiality.

### How to Format a Scientific Paper

Only in very rare cases will the paper be accepted right away. Nothing is more frustrating to a reviewer than vague sentences about a variable being significant without any supporting details. This article has been viewed 613,295 times.

### Successful Scientific Writing and Publishing: A Step

Submit the Work Here arrives the main step of writing a research paper — submitting work to journals for consideration. Only appendices referred to in the text should be included. The results should be short and sweet.

Authors should recognize that while revise-and-resubmit requests may state that the manuscript is not acceptable in its current form, this does not constitute a rejection of the article.

### **Writing and Publishing a Scientific Research Paper**

These should be the touchstones or benchmarks for authors of research articles, particularly in the field of science, which has a reputation for being difficult to understand. However if more authors are involved, you may use 'et al', an abbreviation of Latin meaning 'and others'. The first step is to be taken by the author.
