Fortress Louisbourg

There was no seigneurial regime, the fur trade was negligible, the institutional power of the church was minimal, males greatly outnumbered females, and there were numbers of non-French peoples mostly Basques, German and Swiss living and working alongside the French majority. In 1744, the fortress was an important seaport for France.

History

At the Hôtel de Marine and the Grandchamps Inn, where townsfolk and off-duty soldiers would have congregated, you get only a large spoon as your eating utensil. Ocean-going vessels from France, the West Indies, and Canada — and coastal ships from New England and Acadia — used Louisbourg as a trade and transshipment centre. It was returned to the French in exchange for border towns in what is today Belgium.

History

In addition to deporting the French and Acadians on Île Royale, the English took the opportunity to finish the 1755 deportations to send the Ile St. The town and settlement along the harbour shore soon became a thriving community. The smallest value in the 18th-century French monetary system was the denier.

Louisbourg's commercial success was able to bring ships from Europe, The West Indies, Quebec, Acadia, and New England.
