Census India 2011

This gap has remained fairly wide and has kept widening since 1971-81, as seen in the Table.

Census India 2011

But compared to the average national accretion of 0. Of the total population of 9. This article provides an in-depth picture of Hindu-Muslim fertility differentials at the district level and their trends at the state level.

Publications of the 1971 Census of India on JSTOR

It seems that the populations in this region remained unsettled in the first couple of decades after Partition. Muslim share in this whole belt up to the sub-district level is shown in the Map below. Notably, none of the districts in Bihar have attained such low levels of fertility for the Hindu population.
