. The primary deposit at the bottom of H85 consisted of ash, sand-size charcoal, charred seeds, animal bones, shells, and restorable ceramic vessels.

## Open Research: 红旗内部文稿第15期(总204)

The author's view is that outside military involvement in Vietnam was wrong, and therefore Australia's involvement in the war was a mistake. In addition, since YGZ was so close to the political center at the time, people may not have been able to choose freely where to settle in this area.
