Otte Brahe, Tycho's father, was from the Danish nobility and was an important man among the Danish King's closest group of supporters. He purchased an ephemeris and books such as 's Tractatus de Sphaera Treatise on spheres , 's Cosmographia seu descriptio totius orbis Cosmography or the description of the entire world and 's De triangulis omnimodis All kinds of triangles.

## Astronomical Instruments, Renaissance

It contains a dedication to Czech nobleman Oldrich Desiderius Pruskovsky of Pruskov written and signed by Tycho Brahe. Although he drank a little overgenerously and experienced pressure on his bladder, he felt less concerned for his state of health than for etiquette. Less than one hundred copies were made as Tycho planned to distribute them himself as gifts to various rulers and nobles he encountered during his search for patronage.
