Childbirth without Fear: The Principles and Practice of Natural Childbirth

A birth center affiliated with the tertiary care center; comparison of outcome, in Obstet Gynecol 1986;67 4 :598-603, found that a greater percentage of babies born in hospitals had the potentially life-threatening shoulder dystocia, or shoulders stuck in the birth canal a condition to which the hospital procedures of delivery flat on the back and forceps delivery predisposes the infant ; and Olsen O. He simply restates that if it hurts its because of fear.

I get that some labors are easier then others, that some peoples bodies are built different, but I don't think this guy gets that. I wanted to be 100 % present in the moment for my baby and for myself.

Welcoming the Baby at Birth: A Personalist Analysis of Natural vs. Medicalized Childbirth by Sarah Smith Bartel

Theology of the Body: Human Love in the Divine Plan, with a forward by John S. It was very detailed and I gained insight into my own anatomy. Some of these include: as mentioned above slowing labor, which leads to the use of Pitocin to stimulate labor, which brings about unnaturally strong, fast, and painful contractions that usually lead to higher episiotomy rates; greater use of vacuum-extractors and forceps which cause a greater likelihood of anal tears ; higher cesarean rates; and greater likelihood of needing bladder catheterization which can cause urinary tract infections.

I will give thanks to You, for I am fearfully and wonderfully made; Wonderful are Your works, And my soul knows it very well. Essential reading for all parents-to-be, childbirth educators, midwives and obstetricians! There's the evolutionary argument, of pain evolving only for adaptive purposes, and labor must be a rewarding behavior for propagation of the genes, therefore childbirth must be devoid of pain because moms must like giving birth to actually do it.
