Gay Rights

As a result of hard work by countless organizations and individuals, helped by internet and direct-mail campaign networking, the 21st century heralded new legal gains for gay and lesbian couples. Early efforts to understand the range of human sexual behavior came from European doctors and scientists including Carl von Westphal 1869 , Richard von Krafft-Ebing 1882 and Havelock Ellis 1897. Also located in chapter 3 is a section of interview references.
