

# Higher learning and high technology - dynamics of higher education policy formation

State University of New York Press - Education policy

**Five major themes about the future of jobs training in the tech age**

**TOPICAL THEMES**

- Theme 1** The training ecosystem will evolve, with a mix of innovation in all educational realms
  - More learning systems will migrate online. Some will be self-directed and personalized or required by employers, others will be hybrid online/real-world classes. Women will be expected to lead this shift.
  - Diversification will bring a boost from advances in augmented reality (AR), virtual reality (VR) and artificial intelligence (AI).
  - Universities still have special roles to play in preparing people for life, but soon there's likely to diversify and differentiate.
- Theme 2** Learners must cultivate 21st-century skills, capabilities and attributes
  - Tough-to-teach competencies such as emotional intelligence, curiosity, creativity, adaptability, resilience and critical thinking will be most highly valued.
  - Practical, experiential learning via apprenticeships and mentoring will advance.
- Theme 3** New credentialing systems will arise as self-directed learning expands
  - While the traditional college degree will hold sway in 2026, more employers may accept alternate credentialing pathways as self-directed learning options and their resources evolve.
  - The proof of competency may be in the results work portfolio.

**CONCERN**

- Theme 4** Training and learning systems will not meet 21st-century needs by 2026
  - With investment in basic education systems at record highs, the lack of adapting to train or retain people for the skills they will be most prized in the future.
  - Show me the money: Many costs hinge upon a lack of political will and necessary funding.
  - Some people are incapable of or uninterested in self-directed learning.
- Theme 5** What's next? Technological forces will fundamentally change work and the economic landscape
  - There will be many millions more people and millions fewer jobs in the future.
  - Capitalism itself is in real trouble.

## Higher Education

IHEs should conduct of students, faculty, and staff for purposes of surveillance or in the context of an outbreak; however, the recommendations vary based on whether or not a person is fully vaccinated. There must be real change -- change beyond simplistic answers such as reducing costs and improving efficiency -- to improve value.

## The acceleration of hybrid learning for higher

Nous proposons le livre sous toutes ses formes : neufs, d'occasion, anciens, introuvables, eBooks.

## Considerations for Institutions of Higher Education (IHEs)

Student learning and student affairs work: Responding to our imperative.

## Education policy

Currently, CDC recommends continued masking and physical distancing for people with weakened immune systems. Horizontal integration supports the coupling of programs, services, and activities in time, space, and geography.

## Essay on making student learning the focus of higher education

MMWR Morb Mortal Wkly Rep.

## Department of Higher Education and Training

Progress will not be made in improving the quality and quantity of learning -- in restoring higher learning to higher education -- unless both the

public discussion and the multilayered, multistep processes of change on our campuses occur. This guidance can also be applied to COVID-19 vaccines that have been authorized for emergency use by the e. People who are fully vaccinated are at low risk of symptomatic or severe infection, and a suggests that people who are fully vaccinated are less likely to have asymptomatic infection or transmit the virus that causes COVID-19 to others.
