

Incentive asymmetry between early and late comers in adopting flexible mass production - a spatial model

City Polytechnic of Hong Kong, Department of Economics and Finance - Knowledge of the Firm, Combinative Capabilities, and the Replication of Technology

Description: -

- Industrial organization (Economic theory)
- Diversification in industry -- Mathematical models.
- Diversification in industry.
- Barriers to entry (Industrial organization)
- Competition.
- Flexible manufacturing systems -- Mathematical models.
- Flexible manufacturing systems. Incentive asymmetry between early and late comers in adopting flexible mass production - a spatial model

- Working paper series (City Polytechnic of Hong Kong, Department of Economics and Finance) -- no.63 Incentive asymmetry between early and late comers in adopting flexible mass production - a spatial model

Notes: Includes bibliographical references (p31-32).
This edition was published in 1995

Determinants of Perceived Ease of Use: Integrating Control, Intrinsic Motivation, and Emotion into the Technology Acceptance Model

The Aristotelian picture of the universe was of course composed of a group of perfect crystal spheres centering on, and revolving about, the Earth.

Spin

The roles of child reactivity and parenting context in infant pain responses.

ACNP 58 th Annual Meeting: Poster Session III

Psychological and physiological responses to stress: The right hemisphere and the hypothalamo-pituitary-adrenal axis, an inquiry into problems of human bonding.

Ambidexterity lost? Compromising innovation and the exploration/exploitation plan

To characterize these group differences parsimoniously and minimize multiple testing, we used a standard signal extraction method RICA to reduce the 23 edges into 2 independent subcomponents.

evolution of power in the global coffee value chain and production network

Countercyclical marginal costs exacerbate the procyclicality of dividends after a technology shock, and hence their riskiness, and generate countercyclical inflation. Percent signal change PSC for a priori bilateral dorsolateral prefrontal cortex dlPFC , amygdala, and striatum regions of interest were extracted for trials in which participants were faced with approach-avoidance conflict decisions.

Knowledge of the Firm, Combinative Capabilities, and the Replication of Technology

Discourse, prediction, and recent studies in attachment: Implications for psychoanalysis.

ACNP 59 th Annual Meeting: Poster Session II

Immediately after, animals were anesthetized with isoflurane and received 50 Hz, pulse width: 0.
