Current epidemiological and etiological characteristics and treatment of seizures or epilepsy in patients with HIV infection

Sinha S, Satishchandra P, Nalini A, et al. As a result, the World Health Organization, other international agencies, and national governments are actively encouraging the shifting of clinical care responsibilities to lesser trained, less expensive, and generally less scarce cadres of the clinical workforce. Table showed the proportion of 10 years survival after HIV diagnosis.

Early versus delayed initiation of antiretroviral therapy for Indian HIV

Patients with the HLA-B5701 gene variant cannot take abacavir as they have a higher risk of developing a possible life-threatening reaction to the medicine. Differences in non-ARV drug and lab test costs can be attributed to the greater latitude doctors have in prescribing drugs and diagnostics beyond what is mandated by guidelines.

Quality of life and cost

Clin Infect Dis 54: 878—881.

Early versus delayed initiation of antiretroviral therapy for Indian HIV

Holden E, Thanh Nguyen H, Grossman E, Robinson S, Nelson L, Gunter M, et al. Lancet HIV 2016;3 4 :e158-165. Hsiao NY, Stinson K, Myer L 2013 Linkage of HIV-infected infants from diagnosis to antiretroviral therapy services across the Western Cape, South Africa.
