## NHS England » NHS England's plan to eliminate Hepatitis C decisively backed by High Court

Click to highlight passage referred to. Given funding constraints and the current policy emphasis on recovery from addiction and abstinence rather than harm reduction, it may be unrealistic to expect a further major contribution to stemming the hepatitis C epidemic from services intended to ameliorate the damage from continued injecting.

Heffernan A, Cooke GS, Nayagam S, Thursz M, Hallett TB, Hofstraat SHI, Falla AM, Duffell EF, et al.

## Review

Head to the NHS England website to and book onto the session. It that to get to the point where less than 1 in 10 injectors in London are infected with hepatitis C would require the average injector to cut their sharing of used syringes from 16 times a month to one or two times, and that the impact of even this kind of achievement would be jeopardised unless sharing reductions extended to very recently initiated injectors.
