## ADW: *Hermetia illucens*: INFORMATION

Quantification of expression levels of GluCl<sub>α</sub> using qRT-PCR showed that transcription was fully disrupted in GluCl<sub>α</sub> FlpStop.

## ON selectivity in the *Drosophila* visual system is a multisynaptic process involving both glutamatergic and GABAergic inhibition

Larvae, pupae and adults were injected in the abdomen on the ventral side with 125—500 ng dsRNA using pulled glass needles and a Nanoject II TM injector Drummond Scientific Company. The highest number of bands was recorded at 72 h post injection, Twelve bands ranged from 79. Phenobarbital treatment Mosquitoes were exposed to phenobarbital PB Gardenal ®, Rhodia Farma, Brazil using two different treatments: 1 continuous treatment, in which A.

## US9844223B2

The octopamine receptor antagonist phentolamine 100 μM was co-incubated with cells for 1 h before drug challenge.

## Effect of phenobarbital on inducing insecticide tolerance and esterase changes in *Aedes aegypti* (Diptera: Culicidae)

Shruti Satpute and Trupti Tondarkar for their kind assistance while rearing the insects. If inside a building after dark, they tend to congregate on ceilings, beams, and overhead wires, while out of doors, they crawl into foliage or long grass, or rest in shrubs and trees or on wires.

## Activities and Novel Applications of Secondary Metabolite Coumarins

Generally, the division Angiospermae is preferably rich in simple coumarins, followed by the furo and pyranocoumarins Ribeiro and Kaplan, 2002.

## **Investigation Into The Blowfly Larvae's Response To Light**

Staying in a darker area will make the maggots less visible to predators which will increase their chances of survival.
