### Open Research: Infant and child mortality in Zimbabwe : an analysis of levels, trends, differentials and determinants

A RPR focuses on synthesizing information regarding a programme task sharing programme for family planning in this case through desk-review of programme documents, reports and key stakeholder information. The chartbook was developed to provide readers with an easy-to-use collection of current jurisdiction data on critical issues of relevance to women.

### CiteSeerX — Zambezia (1992), XK (ii). FERTILITY LEVELS AND TRENDS IN ZIMBABWE

Conclusions Task sharing plays a role in increasing contraceptive uptake and holds promise in promoting universal access to family planning in the SSA region. A characterisation of world union patterns at the national and regional level.

### Demographic and health surveys: a profile

By definition, task sharing involves the safe expansion of tasks and procedures that are usually performed by higher-level staff i. The trend in Implants Jadelle and Implanon utilisation is depicted in Fig.

### How Increased Contraceptive Use has Reduced Maternal Mortality

Dhaka, Bangladesh, and Calverton, MD USA. Population and Development Review, 2001; A supplement to Vol.

Antony Chikutsa

Data collection is complete and analysis is ongoing. For instance, within a period of six months February to September 2017 during the implementation of task sharing for family planning by trained CHWs and midwives, a total 1225 implants—of which 857 were new users—were administered.
