SIMRAD® STRUCTURESCAN® 3D

Higher frequency sonar resolves the red blob into a school of small, white dots.

Introducing Axiom™ Multifunction Displays with RealVision 3D™ Sonar & Lighthouse 3

You can observe from a distance and when you see something interesting, easily create a waypoint on your GPS-interfaced display for later reference.

US6449215B1

Second only to draining a lake, RealVision 3D finally gives anglers, divers, search and rescue teams, and boaters a true, easy-to-understand view of bottom topography, debris, and fish. ForwardScan shows you color-coded depth indicators; green for deep water, yellow for medium depths, and red for dangerous shoals. Range-azimuth and range-elevation plots are plots that relate intensity of objects to their position relative to the nose of the sonar.

US5184330A

A wide cone angle beam will cover a large viewing area and consequently aid in finding fish.

Masking in three

The Information Processing Section IPS of the present invention is controlled by a single microprocessor.

Three

The 74cv comes with a transducer for high-definition traditional sonar and CHIRP sonar. Crowdsourcing the collection of road surface information
