## Protestant, Catholic and Jews Religion Issue

Weber did not dwell on these features of charisma in folk religion because he wanted to employ the term to understand the secular dynamic of authority and leadership in social institutions. People had turned out to live in the framework of reality, and they had forgotten about religion.

Such people would not want to be identified as Protestants, Catholics, or Jewish, and they preferred to be identified by what they did. Many religions might have arisen ever since the twentieth century, but the three main religions are dominant across the world. What remains disputable is the impact on individual self-identification, belief, and practice.

Of course, the various religions would reduce to a common system that would enable people to interrelate with one another. Of course, it is easy to criticize popular spirituality, to find it shallow and lacking in substance, more of a fad than of any lasting significance. Others for instance, Holl in Enthusiasmus und Bussgewalt have clarified certain important consequences of it.
