## MOFA: CHAIRMAN'S STATEMENT OF THE ASIA

The Meeting recognised the need to strive for a common goal of maintaining and enhancing peace and stability, as well as creating conditions conducive for economic and social development. This paper aims to examine the concept of freedom of religion under international law focusing mainly on the issue of apostasy in the context of the Malaysian Federal Constitution. The organisation serves as a regional platform for water diplomacy and a knowledge hub of water resources management for the sustainable development of the region.

## Contemporary Water Governance in the Global South: Scarcity, Marketization ...

Multilateral frameworks have also put this in focus, with safe and orderly migration seen as important. Through the National Mekong Committees in each country, the programme has developed close links with line agencies and stakeholders in the ten BDP sub-areas. The construction of large-scale hydropower thus re-allocates the benefits of water use away from the local level Bakker.

## Publications

The report contributes by providing a conceptual framework of mapping climate metrics. SUB-REGIONAL COOPERATION IN SOUTHEAST ASIA: THE MEKONG BASIN 1 JÖRN DOSCH AND OLIVER HENSENGERTH Abstract.

## Economic Co-operation in the Greater Mekong Subregion, Asian

The objective is to review efforts in China and India for contributing to learning experiences for other countries. However, centralised large-scale water management responsible for decisions regarding hydropower make action at local level difficult due to the mismatch between decision-making levels and a lack of flexibility. The Mekong region encompasses the six economies of Thailand, Myanmar, Vietnam, Cambodia, Laos and the Yunnan province of China.

## Economic Co-operation in the Greater Mekong Subregion, Asian

It is notable that in the Mekong situation that the cumulative impacts of multiple hydropower developments are more likely to have a significant impact on the river and local livelihoods than any individual project. Seoul, South Korea, Dec, pp. We determined the 40 countries with the highest technical mitigation potential and assessed the feasibility of mitigation action based on their political will and ability to realize this potential.

### **The Mekong River Basic Development : The Realities and Prospects of Korea's Participation**

There is an increasing understanding that only bioenergy that is supplied and used in a sustainable manner has a place in a low carbon energy future.
