## Early intervention for children with developmental disabilities in low and middle

Thus, the logic of multivariate analysis was used, along with inductive reasoning with qualitative data, within cases, and a logic of comparative case analysis when seeking to make and test generalizations based on the set of seven cases. The data underlying this article are available in the article and in its online supplementary material. Early identification of children with developmental disabilities, as well as early childhood intervention ECI , improves children's opportunities to maximise their developmental potential and functioning as well as their quality of life and social participation.

## U.S. Merit Systems Protection Board

Darren is a founding committee member of IP Out, the LGBT+ networking group within the IP Inclusive initiative which promotes diversity and inclusion within the UK Intellectual Property professions, and was a speaker at its inaugural event.

## Reasoning With Case Studies: Issues Of An Aging Workforce

This report summarizes findings from 25 years of survey research have and examines trends over time.

## CDC

EIP has sought to produce innovative and policy-relevant scientific research that achieves international standing in the social sciences and leads to a significant advancement of capabilities and knowledge about elections, democracy, and autocracy. In particular we explore issues underpinning EAP assessment and argue that there is a need to reconceptualise the basis of the language model. This report addresses in depth the legal challenges that whistleblowers face, including the MSPB's own case law and describes the requirements for a Federal employee's disclosure of wrongdoing to be legally protected as whistleblowing under current statutes and case law.
