## Woodland Period

Identified features and artifacts recovered are all associated with the Middle Woodland period Hopewellian occupation. Theories have long circulated as to what happened to the Whittlesey people whose artifacts date to as late as 1650.

## Prehistoric Indian Earthworks in the City of Cleveland and Environs

Moreover, no evidence of later TLW or Mississippian occupations were uncovered.

## A systematic analysis of behavior at late Early Woodland paired

An important component of this study involves the careful chronological evaluation of changes in regional late prehistoric cemetery populations. Historic Interpretation of Old Copper During the 19 th and early 20 th centuries, the prevailing theories of Old Copper production in Wisconsin reflected the social climate of the period, which was rooted in both naiveté and racism.

## Donald E. Janzen

House site provides the first documentation of a specialized Middle Woodland encampment on the banks of the Mississippi with clear stratigraphic evidence of repeated use. During this time, each of the drainage basins can be characterized by a series of phases, although the chronological framework for the eastern drainage basins during the Early and Middle Woodland periods is not as firmly established as for the Ohio drainage basin.

## A new multistage construction chronology for the Great Serpent Mound, USA

For example Adena people ate hickory nuts, black walnuts and beechnuts Some of these nuts were in the process of being replaced by local

grains. Native American culture changes significantly with the arrival of large numbers of Europeans in the seventeenth century. Carr and Adovasio 2002; Raber and Cowin 2003; Raber, Miller, and Neusius 1998; and R.

### **Other Publications**

For the first time, Hins-dale gathered data on American Indian sites in each county of Michigan, including Jackson County.

### **List of Publications**

These seasonal camps were usually located up the larger tributaries into the upland hills.
