## Cancer Mystery?

But the town was divided.

## The Answer to a Colon Cancer Mystery

State and federal authorities are working to determine if the cancers are truly linked — what researchers call a cluster — or just a freakish happenstance.

## Cancer mystery: 20 cases pop up among Satellite High grads

People who had worked within two feet of Ramirez and had handled her intravenous lines had been at high risk.

## 9 investigates: Cancer mystery in Huntersville

Complaining that she was lightheaded, she left the trauma room and sat at a nurse's desk.

## Cancer rates are higher in Brevard. Health officials don't know why

Mooresville isn't the only community in which residents unnerved by seemingly unusual cancer rates are struggling to find answers. The EMBO Journal, 2018; e99735 DOI:

## 9 investigates: Cancer mystery in Huntersville

Savitz served on the science panel that carried out exposure and health studies linked to Dupont's Washington Works Teflon® manufacturing plant in West Virginia. Does the person smoke or have diabetes? Doctors removed tumors in Ricky's chest.

## Cancer mystery: 20 cases pop up among Satellite High grads

Meat contains or contributes to the production of presumed carcinogens, such as N-nitroso compounds. The results of the tests Mundell conducted in the summer of 2018, and again in February of 2019, are worrisome. And it has undesirable consequences for : the postman RNA that sends the signal to produce the bricks of our body proteins begins to accumulate errors and the cell takes on a different appearance, far from the normal epithelium, which we call mesenchymal and which it is associated with the appearance of metastasis.
