## Studies on protozoa in ancient remains

In situ hybridization and sequence analysis reveal an association of Plasmodium spp. Illustrated keys for identification of subgenera and species of these parasites were developed.

## Folia Parasitologica: Haemosporidian infections in captive exotic glossy starling Lamprotornis chalybaeus in Hong Kong

The presence of Plasmodium dominicana in a Tertiary Dominican Republic amber specimen establishes a minimum age for the genus Plasmodium and places avian malaria in the Americas by the mid-Tertiary, supporting earlier theories that some species responsible for primate malaria could have evolved in the Americas Poinar 2005b.

## Types of Microorganisms

Daily food consisted of chopped bananas, watermelon, cantaloupe, seedless grapes, apples, and pears dusted with a protein vitamin supplement Lubee Bat Conservancy, Gainesville, Florida, USA. Characterization of Plasmodium relictum, a cosmopolitan agent of avian malaria.

## Behavioral biology of Toxoplasma gondii infection

IEEE Trans Autom Control 19:716—723.

## Blood Parasite

Second, Plasmodium species parasitaemia is often light in natural infections in the wild. The ordinate shows the relative order abundance in percentage In regard to number of samples from different avian families, the birds of the Anatidae and Psittacidae were best sampled 36. The

pooled prevalence of GIP in buffaloes of India was found to be 46.
